

First Named Inventor: Deborah S. Schnur

Application No.: 10/008,228

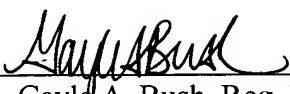

-2-

Each Species of the invention is a slider having a primary air bearing, a secondary air bearing, and an interface connecting the secondary air bearing to the primary air bearing and permitting movement of a transducing head with respect to the slider body. Each Species describes an alternate interface for connecting the secondary air bearing to the primary air bearing.

Respectfully submitted,

KINNEY & LANGE, P.A.
